1.3 Therefore™ Business & Enterprise Editions	6

1. Introduction

The purpose of this white paper is to provide the basis for a best practice guide on the maintenance of Therefore™ systems.

Available Therefore™ editions may vary depending on your country or region.

1.1 Therefore™ Personal Edition

We recommend including the following items in your maintenance plan.

1. Database backup: we recommend that this is done very regularly (see the Backup and Recovery white paper for more information).
2. Buffer backup: this is the only backup of documents. We hence recommend that this is backed up very regularly.
3. Event log: we recommend that this is checked weekly. We recommend that all warnings and errors be attended to.
4. System maintenance: we strongly recommend installing the latest operating system service packs and regular upgrades to the latest Therefore™ version.
5. Registry backup: if any manual changes were made to the registry then we recommend backing up this up. In addition if any Therefore™ Document Loader profiles were created then these are saved to the registry (if they are created on a client then the client registry needs to be backed up). To perform this, open Command Prompt and enter following command(s) where E is the drive where Therefore™ backup is placed.

```
regedit /E E:\Therefore\Backup\Therefore_Reg.reg "HKEY_LOCAL_MACHINE\Software\Therefore"
regedit /E E:\Therefore\Backup\Therefore_Reg.reg
"HKEY_CURRENT_USER\Software\Therefore\DocumentLoader"
```

1.2 Therefore™ Workgroup & Essentials Editions

We recommend including the following items in your maintenance plan.

1. Database backup: we recommend this be done very regularly (see section 2 in the Backup and Recovery white paper for more information).
2. Therefore™ Document backup: we recommend configuring Therefore™ to store documents to Primary and Backup Storage (see Best Practice for System Backup).
3. Event log: we recommend that this is checked on the Server weekly. We recommend that all warnings and errors be attended to.
4. Document verification:
 - a. For a system where backup storage is configured we recommend disk verification once per year
 - b. For a system where backup storage is not configured we recommend disk verification once in 6 months

Note: Please be aware that speed of disk verification depends on number of documents that are stored in a system and presence of primary and backup storage.

5. Software Updates: we strongly recommend installing the latest operating system service packs and regular upgrades to the latest Therefore™ version.
6. Registry backup: if any manual changes were made to the registry then we recommend backing up this up. In addition if any Therefore™ Document Loader profiles were created then these are saved to the registry (if they are created on a client then the client registry needs to be backed up). To perform this, open Command Prompt and enter following command(s) where E is the drive where Therefore™ backup is placed.

```
regedit /E E:\Therefore\Backup\Therefore_Reg.reg "HKEY_LOCAL_MACHINE\Software\Therefore"
regedit /E E:\Therefore\Backup\Therefore_Reg.reg
"HKEY_CURRENT_USER\Software\Therefore\DocumentLoader"
```

1.3 Therefore™ Business & Enterprise Editions

We recommend including the following items in your maintenance plan.

1. Database backup: we recommend this be done very regularly (see the Backup and Recovery white paper for more information).
2. Therefore™ Document backup: we recommend configuring Therefore™ to store documents to Primary and Backup Storage (see the Backup and Recovery white paper).
3. Event log: we recommend that this is checked on the Server weekly. We recommend that all warnings and errors be attended to.
4. Full-text Catalog backup: we recommend for this to be updated on a daily basis.
5. Document verification:
 - a. For a system where backup storage is configured we recommend disk verification once per year
 - b. For a system where backup storage is not configured we recommend disk verification once in 6 months

Note: Please be aware that speed of disk verification depends on number of documents that are stored in a system and presence of primary and backup storage.

5. Software Updates: we strongly recommend installing the latest operating system service packs and regular upgrades to the latest Therefore™ version.
6. Registry backup: if any manual changes were made to the registry then we recommend backing this up. In addition if any Therefore™ Document Loader profiles were created then these are saved to the registry (if they are created on a client then the client registry needs to be backed up). To perform this, open Command Prompt and enter following command(s) where E is the drive where Therefore™ backup is placed.

```
regedit /E E:\Therefore\Backup\Therefore_Reg.reg "HKEY_LOCAL_MACHINE\Software\Therefore"
regedit /E E:\Therefore\Backup\Therefore_Reg.reg
"HKEY_CURRENT_USER\Software\Therefore\DocumentLoader"
```
